PROFILE

Backend software Engineer with 2+ years building production APIs, authentication systems and commerce platforms using GO, Node.js, PostgreSQL, Redis and GraphQL. Experienced designing backend architecture, API integrations and scalable server-side applications from concept through deployment.

TECHNICAL SKILLS

Languages: Go, JavaScript (ES6+), TypeScript
Backend: Go, Fiber, Node.js, Express.js, REST APIs, GraphQL, Authentication, JWT, OAuth, Postman
Databases: PostgreSQL, MongoDB, Redis
Commerce APIs: Shopify Storefront API, Shopify Admin API, Stripe API
Cloud & Deployment: AWS, Render, Vercel, Netlify, Git, GitHub
Frontend: React, Next.js, Tailwind CSS

PROFESSIONAL EXPERIENCE

Backend Software Engineer (Part-Time) | Early Stage Startup *Jul 2026 – Aug 2026*

- Currently building backend services for a real-time multiplayer knowledge platform using **Go, Fiber, PostgreSQL, and Redis**.
- Designing REST APIs, authentication flows, matchmaking services, and server-side game logic.
- Developing scalable backend architecture with Redis caching and PostgreSQL persistence.
- Worked on production-ready backend infrastructure ahead of public launch.

Freelance Full-Stack Developer | Self-Employed / Remote *Sep 2024 – Present*

- Engineered backend systems and API integrations for client platforms using Node.js, Express, GraphQL, and REST APIs.
- Architected Shopify commerce backends with Storefront and Admin API integrations, webhook processing, and metafield-driven data models.
- Designed authentication and role-based authorization for admin dashboards, securing access to order, inventory, and customer data.
- Built real-time inventory and order synchronization pipelines with automated customer email workflows.
- Owned technical architecture across the client lifecycle — requirements, API design, deployment, and documentation.

Frontend Developer | 9QUEST (Startup, Part-Time) *Sep 2024 – Jan 2025*

- Built the frontend landing page for 9QUEST's product platform using React, Tailwind CSS, and JavaScript; product did not reach launch.

SELECTED PROJECTS

ShopSphere — E-commerce Platform — shopsphere-online.netlify.app
Stack: Node.js, Express, MongoDB, Stripe API, Google OAuth, REST APIs

- Architected a REST API backend for a full e-commerce platform, handling product, order, and user data with MongoDB.
- Implemented Google OAuth and session-based authentication alongside Stripe payment processing for secure checkout.
- Designed a role-based admin dashboard backend with full CRUD endpoints for products and orders.
- Designed MongoDB collections and backend services supporting analytics, product management and order workflows.

Sundress — Headless Shopify Commerce Platform — sundressmade.com
Stack: Node.js, Next.js, Shopify Storefront & Admin API, GraphQL, Resend

- Engineered the backend integration layer connecting a Next.js storefront to Shopify's Storefront and Admin APIs via GraphQL.
- Built webhook-driven inventory synchronization and a back-in-stock notification system with automated email delivery via Resend.
- Designed a metafield-driven content architecture so admins manage all storefront content directly from Shopify with zero developer intervention.
- Implemented server-side rendering and API routes to serve real-time product and inventory data.

En Garde — Headless Shopify Commerce Platform — engardeclothing.com
Stack: Node.js, Next.js, Shopify Storefront & Admin API, GraphQL

- Integrated Shopify Storefront API with a Next.js storefront to deliver product data, collections, filtering, and pagination.
- Implemented metafield and metaobject integrations for storefront content, product information, and maintenance mode.
- Built a restock notification system with webhook processing, scheduled checks, and automated customer emails, alongside preorder quantity limits.

EDUCATION

Bachelor of Science in Political Science(BSc)
University of Nigeria, Nsukka • 2024
